CHAPTER V

CONCLUSIONS AND SUGGESSTIONS

A. Conclusions

After analyzing the quantitative data, conclusions are drawn as the following. There is a significant improvement of the mean in test of cycle 1 (67,2) and the mean in test of cycle 2 (81,2). Moreover, the qualitative data showed that the students were more interested and enjoyable in learning narrative writing by applying Spore strategy. Therefore, it can be concluded that the application of Spore strategy can significantly improve students' achievement in writing narrative text.

B. Suggestions

In line with the conclusions, some points are suggested to:

1. English teachersare advised to apply SPORE strategy so that they can improve their students' achievement in writing narrative text.
2. The readers, who are interested in dealing with this study, are suggested that they have good understanding about how to improve their ability in writing narrative text by applying SPORE Strategy.
