LIST OF TABLE

		Page
Table 2.1	Scoring Criteria for Mathematics Communications	18
Table 2.2	The Steps of Cooperative Learning model	23
Table 2.3	Learning Syntax with Think-Talk-Write Model	30
Table 3.1	The steps in cycle I	44
Table 3.2	The steps in cycle II	45
Table 3.3	List of students' predicate and the criteria	50
Table 3.4	Interpretation of Students' Mathematical Communication Ability	50
Table 3.5	Interpretation of Gain normalization	51
Table 3.6	Interpretation of Students' Activity	53
Table 3.7	Interpretation of Teacher's Response	54
Table 3.8	Interpretation of Students' Response Individually	55
Table 3.9	Interpretation of Students' Response Classically	55
Table 4.1	Data of Initial Mathematics Communication Ability of Students	59
Table 4.2	Observation of Teacher's Activity in Cycle I	62
Table 4.3	Observation of Students' Activity in Cycle I	63
Table 4.4	Result of Students' Response Questionnaire to Mathematics Learning in Cycle I	66
Table 4.5	Results Description of Students' Mathematical Communication Ability Cycle I	67
Table 4.6	The Description of Students' Mathematical Communication Ability in Writing Situation or Mathematical Idea into Picture Test I	69
Table 4.7	The Description of Students' Mathematical Communication Ability in Illustrating The Mathematical Idea in Mathematical Model Test I	69
Table 4.8	The The Description of Students' Mathematical Communication	

	Ability in Explaining The Procedures of Solution Test I	70
Table 4.9	Result of Students' Mathematical Communication Ability in Cycle I	71
Table 4.10	Data of Students' Mastery Learning of Mathematical Communication Test in Cycle I	72
Table 4.11	Observattions of Teacher's Activity in Cycle II	77
Table 4.12	Observattions of Students' Activity in Cycle II	78
Table 4.13	Result of Students' Response Questionnaire to Mathematics Learning in Cycle II	80
Table 4.14	Results Description of Students' mathematical Communication Ability Cycle II	82
Table 4.15	The Description of Students' Mathematical Communication Ability in Writing Situation or Mathematical Idea into Picture Test II	83
Table 4.16	The Description of Students' Mathematical Communication Ability in Illustrating The Mathematical Idea in Mathematical Model Test II	83
Table 4.17	The The Description of Students' Mathematical Communication Ability in Explaining The Procedures of Solution Test II	84
Table 4.18	Result of Students' Mathematical Communication Ability in Cycle II	85
Table 4.19	Data of Students' Mastery Learning of Mathematical Communication Test in Cycle II	86
Table 4.20	Description Increasing of Students' Mathematical Communication Ability Based on Cycle I and Cycle II Test	86
Table 4.21	The Increasing Criteria of Each Indicator	88
Table 4.22	The Difference Between Cycle I and Cycle II	89
Table 4.23	The Weakness and The Improvement of Cycle I and Cycle II	90
