CHAPTER I: INTRODUCTION

1.1. Background 1
1.2. Problem Identification 4
1.3. Problem Formulation 4
1.4. Scope of Research 4
1.5. Research Objectives 5
1.6. Research Benefits 5
1.7. Operational Definition 6

CHAPTER II: REVIEW REFERENCE

2.1. Theoretical Background 7
2.1.1. Learning and Teaching 7
2.1.2. Cooperative Learning 9
2.1.3. Element of Cooperative Learning 10
2.1.4. Cooperative Learning in Mathematics 11
2.1.5. Model of Learning Think Pair Share 12
2.1.6. The Excess and The Weakness of TPS 14
2.1.7. Thinking Empowerment by Question Technical 15
2.1.8. Conventional Learning 17
2.1.9. Learning Outcomes of Mathematics 18
2.1.10. Material of Research 21
2.2. Conceptual Design
2.3. Research Hypothesis

CHAPTER III : RESEARCH METHODOLOGY
3.1. Time and Place of Research
3.2. Population and Sample Research
3.2.1. Population
3.2.2. Sample
3.3. Design of Research
3.4. Variable of Research
3.5. Research Procedure
3.6. Instrument to Collect Data
3.7. Data Analysis Technique

CHAPTER IV : THE RESULT AND DISCUSSION
4.1. Description Data The Research
4.1.1. Data Pretest Student’s Learning Outcomes in Experiment class I and Experiment class II
4.1.2. Data Posttest Student’s Learning Outcomes in Experiment class I and Experiment class II
4.2. Analysis of Research Data
4.2.1. Normality Test of Student Learning Outcomes
4.2.2. Homogeneity Test of Student Learning Outcomes
4.2.3. The Hypothesis Test
4.3. Discussion of Research Result

CHAPTER V : CONCLUSION AND SUGGESTION
5.1. Conclusion
5.2. Suggestions
