LIST OF FIGURES

		Page
Figure 2.1.	The respiratory tract extends from the nasal cavity to the lungs, which are composed of air sacs called alveoli	17
Figure 2.2.	The path of air	18
Figure 2.3.	Placement of the vocal cords	20
Figure 2.4.	The structure of trachea	21
Figure 2.5.	Gas Exchange in the lungs	23
Figure 2.6.	Respiratory membrane consist of alveolar wall and the capillary wall	24
Figure 2.7.	Volume of respiration	25
Figure 2.8.	Inspiration versus expiration	27
Figure 2.9.	Control of breathing	29
Figure 2.10.	Mechanism of gas exchange	30
Figure 2.11.	Common Brochial and pulmonary disease	36
Figure 2.12.	Normal lung versus cancer lung	37
Figure 3.1.	Design of experiment	42
Figure 4.1.	The level of student motivation from cycle I to cycle IV	55
Figure 4.2.	The level of student learning outcomes from cycle I to cycle IV	56
Figure 4. 3.	The level of student motivation from cycle I to cycle IV	59
Figure 4.4.	Comparison of student's motivation from cycle I to cycle IV	
Figure 4.5.	The comparison of students' mastery level from cycle I to cycle IV	60
Figure 4.6.	The comparison of students' activity from cycle I to cycle IV	61
