CHAPTER V
CONCLUSIONS AND SUGGESTIONS

A. Conclusions

The elaboration of the data analysis showed clearly that implementing Group Investigation Technique improved the students' achievement in writing descriptive text in sharing their experience. The quantitative data showed their achievement's improvement as a whole. In the test 1, the mean of the students' score was still in the same cycle, test 2 showed that their mean score was though there was an improvement, it was still not enough. It was then deliberately decided that the second cycle needed conducting to improve their score. Their mean score in cycle II improved significantly.

Observation result showed that the students showed that the students behavior was good in the process of through Group Investigation Technique. It helped them score higher. Questionnaire report showed that the students agreed that the application of Group Investigation Technique helped them in sharring their experience confidently. It also raised their motivation as well. It can be concluded that the application of Group Investigation Technique significantly improved the students' achievement in writing descriptive text in sharing their experience.

B. Suggestions

Based on the result of this study, the use of Group Investigation Technique could improve the students' achievement in writing descriptive text. The

following suggestions are offered:

1. To the students, they are suggested to use Group Investigation Technique while writing in the class so they can write descriptive text easily.
2. To the teachers, they are suggested to apply Group Investigation Technique so that they can improve their students' achievement in writing descriptive text.
3. To all the readers, may this research bring them into good understanding how to improve the students' writing ability through Group Investigation Technique.
