Abstract	***i***
Contents	***ii***
Table List	***iv***
Figure List	***v***
Appendix List	***vi***
CHAPTER I INTRODUCTION	**1**
1.1 Background	1
1.2 Problems Identifications	10
1.3 Problems Limitations	11
1.4 Questions of Research	11
1.5 Purposes of Research	11
1.6 Research Implications	12
1.7 Hypothesis	12
1.8 Operational Definition	12
CHAPTER II LITERATURE REVIEW	**14**
2.1 Educational Research and Development	14
2.2 Inquiry Based Laboratory	19
2.2.1 Phases of Inquiry in Laboratory	28
2.3 Laboratory Manual	35
2.4 Competencies in Laboratory	47

2.5 Conceptual Study 57
CHAPTER III RESEARCH METHOD 59
3.1 Research Method 59
3.2 Subjects of Research 59
3.3 Procedures for Developing and Testing of Laboratory Manual 60
3.4 Data Collection Techniques 63
3.5 Instruments 63
3.6 Developing of Research Instrument 63
3.7 Data Analysis Techniques 64
3.8 Location and Time of Research 68
CHAPTER IV RESULTS AND DISCUSSIONS 69
4.1 Data Results 69
4.1.1 Development of Laboratory Manual 69
4.1.2 Preliminary Field Test and Laboratory Manual Revision 71
4.1.3 Main Field Test of Laboratory Manual 75
4.1.3.1 Learning Process in General Physics II Class 75
4.1.3.2 Learning Assessment in General Physics II Class 77
4.2 Final Laboratory Manual Revision 85
4.3 Research Reinforcement 86
CHAPTER V CONCLUSIONS AND RECOMMENDATIONS 89
5.1 Conclusion 89
5.2 Recommendation 90
REFFERENCES 91
APPENDIX 96

TABLE LIST

Table	Title	Page
2.1	A rubric to characterize inquiry in the undergraduate laboratory	27
2.2	The phases of Inquiry Model by Joyce et al, 2009	30
2.3	Phases and sub-phases of the synthesized inquiry-based learning framework	33
2.4	Advantages and disadvantages of Cookbook	44
2.5	Major differences between traditional cookbook and authentic inquiry-oriented lab activities	46
3.1	The standard suitability of content of laboratory manual	65
3.2	Score categories of laboratory manual component	66
3.3	The competencies on scientific investigation in laboratory	67
3.4	The schedule of research	68
4.1	A rubric to characterize inquiry on the laboratory manual	69
4.2	Student's performance rubric in laboratory	79
4.3	Average marks of psychomotor domain category	83

LIST OF FIGURES

Figure	Title	Page
2.1	Phases of inquiry-based laboratory investigation by Warner & Myers (2014) adapted from Llewellyn (2002).	29
2.2	Visualization of the process by which the initial 34 groups of inquiry activities were merged into bigger groups and finally into five general inquiry phases (Pedaste et al, 2015).	32
2.3	Outline of a generic science research process indicating where science tools are used by Dalgety, M.Z (2013)	53
3.1	Stages and procedures of research modified from Gall & Borg, 1983.	62
4.1	Validator's response to the laboratory manual	72
4.2	Student's response in small group to the laboratory manual	73
4.3	Student's response to the laboratory manual	74
4.4	Learning process flow in General Physics II class	76
4.5	Holistic result of the student's ability to perform experiments successfully without supervision.	80
4.6	Holistic result of the student's ability organizes and perform experiment safely and awareness of priority in laboratory	80
4.7	Holistic result of the student's ability to show engagement in conducting experiments.	81
4.8	Holistic result of the student's ability to demonstrate care and respect for the equipment set-up.	81
4.9	Level of skill performance for a group contrasted with individual student performance.	84
4.10	Student response to the laboratory manual	85

Appendix

Appendix	Title	Page
1	Syllabus	93
2	Lesson plan	101
3	Laboratory Manual	104
4	Letter of Recommendation and Experts validation	134
5	Questionnaire for Laboratory Manual	141
6	Validation of Laboratory manual by the experts	144
6a	Validation of Laboratory manual by the students (small group)	145
6b	Validation of Laboratory manual by all students (large group)	146
7a	Student’s ability to perform experiments successfully without supervision on experiment 1	147
7b	Student's ability to organize and perform experiments safely and with an awareness of priority in lab in experiment 1	148
7c	Student’s ability to show engagement in conducting experiments on experiment 1	149
7d	Student's ability to demonstrate care and respect for the equipment set-up on experiment 1	150
8a	Student’s ability to perform experiments successfully without supervision on experiment 2	151
8b	Student's ability to organize and perform experiments safely and with an awareness of priority in lab in experiment 2	152
8c	Student’s ability to show engagement in conducting experiments on experiment 2	153

8d	Student's ability to demonstrate care and respect for the equipment set-up on experiment 2	154
9a	Student’s ability to perform experiments successfully without supervision on experiment 3	155
9b	Student's ability to organize and perform experiments safely and with an awareness of priority in lab in experiment 3	158
9c	Student’s ability to show engagement in conducting experiments on experiment 3	157
9d	Student's ability to demonstrate care and respect for the equipment set-up on experiment 3	158
10	The student’s activities in preliminary field test	159
11	The student’s laboratory performance in exp.1, exp.2, and exp. 3	160
