ACKNOWLEDGEMENT

Alhamdulillahirobbil'alamin-a very huge thanks to Allah for all the graces and blessings and give me health to me for finishing this thesis well.

The title of this thesis is "Effect of Problem-Based Learning Using Molymod Made of Plasticine Towards Improving Senior High School Students' Achievement in Hydrocarbon Topic". This research is done in SMA Negeri 16 Medan. Therefore, this thesis writing is one of the prerequisite to get the degree of Sarjana Pendidikan in Chemistry Department, Faculty of Mathematics and Science, State University of Medan.

In this opportunity, me as the writer would like to express my greatest thanks to Drs. Wesly Hutabarat, M.Sc as my thesis supervisor, thanks for his valuable time spent in giving guidance comment and advice during the process of completing this thesis from the beginning of proposal seminar, conducting the research, processing the data of research result and thesis session. The gratitude are also expressed to Prof. Dr. Albinus Silalahi, M.S, Drs Jamalum Purba, M.Si, and Dr. Zainuddin Muhtar, M.Si as my reviewer counselor for their advice, suggestion, guidance, and constructive comment in the process of completing this thesis.

Thanks also to all of staff and lecture in Chemistry Department and Bilingual Chemistry Education Study Program at FMIPA UNIMED who have helped me especially to Prof. Dr. Suharta, M..Si (Alm) and Dr. Iis Siti Jahro, M.Si as my academic supervisor. The gratitude also presented to Dra. Hj. Sri Irawati, M.Pd as principle of SMA Negeri 16 Medan who give permission for conducting the research in school and also for all teacher and students in SMA N 16 Medan, especially Mrs. R. Pardede, S.Pd., M.Si as chemistry teacher who has given much support and guidance for me as long as the research is conducted.

The special gratitude is belonging to my beloved father Muhammad Ramli and my beautiful lovely mother Rahbiah S.Pi who will never get tired of praying and struggling for the success of my study every day and also to both of my beloved little brother (M. Rahmatullah Amin and M. Rizqi Fadhillah Akbar) for

their love, support, prayer, and comment, also the motivation to the writer for finishing the study in UNIMED.

Special thanks also to my best friends, Nurul Wahidah Nasution and Ervi Luthfi Sheila Wanni Lubis for your time to accompany me during the research. My best friends Santhy Ardelina Violita Br Pinem, Fredika M.S. Gultom and Ika Ulansari for the support. All of my friends in Bilingual Chemistry 2010, thanks for the togetherness in this 4 years and the support for me to finish my thesis. Thanks to my partner, Sinitta Ella Siregar, that always accompany and give many support for me. I must be remember every moment when we struggle to finish this thesis together. Thanks also for the support, pray and motivation to my beloved sister that bind with me because of Allah, Yuni Muslimah Sari, Sis Shofia Ummi, Sis Suci Muslihani, Erma Suryani, Sabda, and all whose name cannot be mentioned one by one, thanks for everything.

The writer hopes this thesis would be useful for the researcher who wants to make the further study about the learning model which is suitable for learning hydrocarbon, especially for the students in chemistry department. The writer realizes that this thesis is still far from perfections, therefore suggestions, comments, and constructive criticism from readers are needed for further improvement of this thesis.

Medan,
Writer,
