LIST OF TABLE

		Page
Table 2.1.	The table of relationship between *Q* and *K* in chemical Equilibrium	35
Table 3.1.	The description of population and samples that selected as samples in the study of the development of innovative learning material reaction rate with active learning and multimedia.	36
Table 3.2.	The Description of Analysis Textbook that are include in The survey	41
Table 3.3.	Validity Criiteria Analysis of innovative Chemistry Learning Material	44
Table 4.1.	The Description of General Chemistry Textbook that are included in the survey	46
Table 4.2.	The Percentage Average of Suitability of Description Material for Analyzed Textbook	48
Table 4.3.	The Description of Development of Learning Material on the Topic of Chemical Equilibrium	52
Table 4.4.	The Description of Innovation of Learning Material on the Topic of Chemical Equilibrium	55
Table 4.5.	The Description of Integration of Active Learning on the Topic of Chemical Equilibrium	56
Table 4.6.	The Description of Multimedia of Learning Material on the Topic of Chemical Equilibrium	57
Table 4.7.	The Questionnaire Result Chemistry Lecturers and Students	59
Table 4.8.	Trial Description of Learning Material on the Topic of Chemical Equilibrium	61
