DAFTAR TABEL

Tabel

2.1. Penelitian Terdahulu ..........................................................................................37

3.1 Definisi Operasional dan Pengukuran Variabel ...........................................44

4.1 Daftar Sampel Kabupaten dan Kota .............................................................51

4.2 Uji Statistik K-S (Y atas X₁) ...........................................................................52

4.3 Uji Statistik K-S (Y atas X₂) ...........................................................................52

4.4 Analisis Hasil Regresi Y atas X₁ ..................................................................53

4.5 Koefisien Determinasi Y atas X₁ .................................................................54

4.6 Analisis Hasil Regresi Y atas X₂ ..................................................................54

4.7 Koefisien Determinasi Y atas X₂ ..................................................................55

4.8 Uji Multikolinearitas ....................................................................................56

4.9 Uji Koefisien Korelasi ...............................................................................57

5.0 Uji Heterokedastisitas ...............................................................................58

5.1 Analisis Hasil Regresi Berganda ..................................................................59

5.2 Hasil Korelasi Koefisien Korelasi dan Koefisien Determinasi ...............60

5.3 Hasil Uji-t .....................................................................................................61
