A. Conclusions

Based on the analysis of the tweets and questionnaires in social media Twitter in the previous chapter, it can be concluded that:

1. The dominant type of grammatical types that used by the user was Inter sentential code switching (75 tweets, 46.01%). Then it was followed by tag code switching type (56 tweets, 34.35%), intra sentential code switching (32 tweets, 19.63%)

2. The dominant type of contextual types that used by the user was Metaphorical code switching (8 dialogue, 72.72%) and followed by Situational code switching (3 dialogue, 27.27%). The user tends to talk about certain topic especially deal with their daily life. So, the user used the metaphorical type most.

3. There were 8 audiences’ reasons why people switch the code in the social media Twitter. They were talking about particular topic, quoting somebody else, being empathy to express solidarity, interjection, repetition used for clarification, to soften or strengthen request or command, expressing group identity and because of real lexical need. Based on students through questionnaire, the most common reasons for people switch the language was due to the lack of equivalent lexicon in the languages. It was because of real lexical need.
B. Suggestions

By considering the conclusion there are some suggestions which are presented as follow:

1. Theoretically, the students who learn Sociolinguistics need to comprehend code switching. It is because with comprehending more about the code switching in communicating with other through social media, the students will make ideal and successful communication.

2. Practically, the readers especially the student of English Department can choose the code switching as the object of research, because many interesting aspects can be analyzed related to sociolinguistics study especially in social media.
