- ✓ Curriculum Development Policy Challenges in Responding to Global Local-National-presented at the national convention of education in Indonesia V, dated October 5 to 9, 2004 in Surabaya.

B. Suggestion

Based on her research, the writer would like to give some suggestion, as follows:

1. Expected more history students to write about the history of biography that is a milestone in the history of science in order to further the developing history of biography.
2. Expected increase in students who would love the writing of history in a balanced and objective without the intervention of the authorities and the people are sentimental.
3. There needs to be more research and further the role Djanus Djamin even in other fields such as politics and society.
4. The existence of the award as well as an appreciation of the role of Djanus Djamin in the field of education in North Sumatra which is a strong woman and very inspiring.
5. It is hoped young people in North Sumatra especially the womenfolk to be able to follow in the footsteps Djanus Djamin as a woman who has a role in education.

However, she also has an active role in other areas such as politics and society.
