

ACKNOWLEDGEMENT

The greatest praise and thankfulness to the almighty God, Allah SWT for his gracious and blessing who always provide health, spirit, strenght and everything to the writer in finishing this thesis welll and accordance to the planning time. and prophet Muhammad SAW.

This thesis with title *“Development of Innovative Student’s Worksheet In Learning Redox and Electrochemistry Topic to Avoid Student’s Misconceptions.”* has been arranged to obtain of Magister Pendidikan in Department of Chemistry, Postgraduate Program, State University of Medan.

In this opportunity, I would like to express the great appreciation to all of people that help finish this thesis, that are Dr. Zainuddin Muchtar, M.Si as my thesis supervisor I and Dr. M.Yusuf as my thesis supervisor II that have time to gives so many guidance, suggestion, motivation to prepare and finish this thesis.

I also say thanks to Prof. Dr. Ramlan Silaban, M.Si as head of Chemistry department and as my thesis informant that gives suggestion in this thesis and have time to sign all of bundle and thesis. Dr. Mahmud, M.Sc and Dr. Destria Roza, M,Si as my thesis informant that gives suggestion in this thesis. Prof. Dr. Retno Dwi Suyanti M,Si and Dr. Ajat Sudrajat, M.Si as validator of my instrument. Also thanks to Chemistry Education program that give me chance to did my research.

I gratitude also thanks to Kak Desi Yulian S.Pd as administrator in Chemistry Department, thanks to prepare all of our need during in lecture/pascasarjana, in our seminar and thesis defense, always gives us time and place in office “untuk ngadem” when we not have class anymore and listen our “uneg2” in class.

The deepest and special gratitude, appreciation and love to my beloved parents, Drs Marwan Lubis and Dra Mega Erni Siregar for their endless love, support, prays, motivation and careness during arrange this thesis. That always say keep your health to finish this thesis. And also to my beloved brothers, Doli

Maulana Gama Samudra Lubis S.Psi and Dimas Fadhillah M. Akbar Lubis that give me the meaning of true family with support when I am down.

And special thanks also goes to my best friend, Nurul Wahidah Nasution (nurul ndut) that never change always be fans of food from undergraduate until postgraduate and Sri Rahmania (the weird friend with weird hobby) that accompany me from undergraduate until postgraduate and Shanty Violita (good teacher and good wife now) that always with us although she as classmate anymore. Thanks always be with me in sad and happy until 7 years.

Also would like say thanks to my classmate Kimia Reguler Dik A 2015, especially to Tari (the childish one), Bg Awi (The wishes one), Yogi (the un definition one), thanks for your time to accompany me “makan2”, “jalan2”, “koro2” when we stress of this thesis. Also Kristin (the diligent one) thanks to be our partner in “makan2” and suggest Raden as our favorite place, bang Nelius (with jargon “dek tari”nya) and Atika, bang Gaung, Lia and Yelni as the partner in to prepare our thesis examination.

The last for my sister in “kosan gang padi” especially for Ulfa as my roommate that accompany me stay up in the midnight and give some joke to make me not sleepy for finishing this thesis. For my cousin Anggi and for Siti that help me to correct a lot of research instrument that make me in under pressure.

The writer hope this thesis would be useful for everyone who like to explore more about about misconception and learning media in redox and electrochemistry. And writer hope suggestion to make this thesis better.

Medan, April 2017
