CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

After analyzing the data, the conclusions were drawn as the following:

The reading materials were developed by adjusting the materials based on basic competences and the students’ need. The need analysis was conducted on May 22nd 2021 at SMK Negeri 1 Galang. The need analysis questionnaires were distributed to 21 students of X TKJ A. After that, a course grid was designed based on the 2013 curriculum syllabus and students’ need. Then, the new reading materials were developed. The developed reading materials were designed for four meetings and developed based on five stages of scientific approach. Then, the developed reading materials were validated by two experts which were the average scores 3.56 and 3.66. It could be concluded that the reading materials were valid and appropriate to be used for grade tenth students of SMK Negeri 1 Galang. After the developed reading materials were validated, the reading materials could be accessed by the students on Quizizz.com. In Quizizz, there were several features used in presenting the materials such as slide of material, multiple choice, fill in the blank, essay, pictures and etc. These quizizz features were presented appropriate with scientific approach of developed reading materials. Quizizz presented the slide of materials starting from observing that asked the students to observe some pictures and choose the appropriate word.
related to computer device. The second is questioning slide that asked the students to raise some questions in the space provided in slide. The third is exploring slide that asked the students to gain information of adjectives and its category based on the text provided in the slide. The forth is associating slide, this slide presents material about adjectives and descriptive text to the students. The last is communicating slide that presents the activity that asked the students to create a simple descriptive text in the space provided in slide. In order to access the media, the student signed in account or joined using link and put the code that have been shared by the teacher.

B. Suggestions

After developing reading materials for Computer and Network Engineering major, some suggestions were recommended for students, English Teacher, and Other Researcher.

For students, it is suggested that the newly developed reading materials should be used by the English teacher to encourage students of Computer and Network engineering major to learn English related to their major in learning reading materials. it is important to built students' reading skill on understanding the technical terms related to computer because it will enable the students to be qualified for any job that requires workers to be able and capable of using English for the future. Students are also expected to master the use of digital platform such as Quizizz in order to facilitate their learning process during online learning. Furthermore, Quizizz is flexible, easy to use and students do not felt bored during the learning process because it requires smart phone or laptop to access.
For English Teacher, it is suggested that in the teaching and learning process the teacher should be more responsive to the need of the students such as choosing the learning materials and the use of media. If the learning materials relate to their major, the learning process will be successful. Furthermore, regarding the development of technology and problem faced by students during online learning, teachers are expected to use a digital platform in order to help the students improve their reading skill. In case of using digital platform as media in learning English, it is necessary for the English teachers to be able to operate and understand how to use it well. The use of digital platform such as Quizizz makes the teacher involved in supporting technological development in the educational world.

For other material developers, it is suggested that they could develop English materials for high school students with other skills, such as writing, listening, reading or materials that integrate the four skills. It also expected for other developers to emphasize the needs of the learners related to English reading materials and the requirements of the curriculum to develop the materials based on basic competency and scientific approach. Furthermore, Quizizz can be widely used for teaching learning reading and can be tested for better quality as research experiment to measure the effectiveness of
