ABSTRACT

Anggi Nova Erlin Simanjuntak. Study on Teachers' Efforts in Developing Emotional Intelligence for Children aged 5-6 Years at Hosana Duri Kindergarten, Riau T.A 2021/2022. PG-Paud Study Program. Faculty of Education, State University of Medan. 2022.

The problem in this study is that Aud's emotional intelligence is underdeveloped where Aud is still reluctant to socialize with his friends and Aud prefers to be alone. The activities carried out by jumping into the field serve to see how the efforts of teachers in educating Aud's emotional abilities in Tk Hosana T.A 2021/2022 are. This type of research is qualitative. This research uses a case study method and the subjects to be studied are the principal, teachers and AUD to determine the emotional ability of AUD. To get the data accurately, the researcher used interview, observation and documentation techniques. Based on the results that have been examined, it is clear that there are still many early childhood children who cannot control their emotions, this is where the role of the teacher is very important to develop children's emotional intelligence with one example being the teacher must always be there when AUD needs it and the teacher does not choose favoritism between all students and the teacher must able to mediate when Aud was fighting with his friend.
