LIST OF FIGURE

Figure 2.1 Steps of research and development based sugiyono..................18
Figure 2.2 Steps of research and development based Borg and Gall...........19
Figure 3.1 The Procedure in conduct the teaching method on chemical equilbrium.................................................................................................42
Figure 4.1 The Feasibility in Practical Guidance Integrated Guided Inquiry
Model and Practical Guidance used School Subject Research Based on the Aspect of Feasibility Content.................................................................50
Figure 4.2 The Feasibility in Practical Guidance Integrated Guided Inquiry
Model and Practical Guidance used School Subject Research Based on the Aspect of Feasibility Content.................................................................51
Figure 4.3 The Feasibility in Practical Guidance Integrated Guided Inquiry
Model and Practical Guidance used School Subject Research Based on the Aspect of Feasibility Content.................................................................52
Figure 4.4. The Feasibility in Practical Guidance Integrated Guided Inquiry
Model and Practical Guidance used School Subject Research Based on the Aspect of Feasibility Content.................................................................53
