ACKNOWLEDGEMENT

The greatest praise and thankfulness to the Almighty God, Jesus Christ for His grace and blessing who always provide health, spirit, strength and everything to the author in finishing this thesis well and accordance to the planning time.

This thesis, “The Development of Chemistry Module Integrated With Spiritual Value In Salt Hydrolysis Topic” has been arranged to obtain the degree of Sarjana Pendidikan in Department of Chemistry, Faculty of Mathematics and Natural Sciences (FMIPA), State University of Medan (UNIMED).

In this opportunity, the author would like to express the great appreciation to Dr. Ayi Darmana, M.Si as the thesis supervisor, Prof. Dr. Albinus Silalahi, M.Si., Dr. Zainuddin Muhtar, M.Si., and also Drs. Jamalum Purba, M.Si as the thesis examiners and also to Dr. Eddiyanto, Ph.d., as the author’s academic supervisor for their valuable time spent in giving guidances, advices, motivations, comments and suggestions during the process of finishing this thesis and as a coordinator of bilingual program. The author also says thanks to Dr. Asrin Lubis, M.Pd, as the dean Faculty of Mathematics and Natural Sciences, State University of Medan, then Nora Susanty, S.Si, Apt., M.Sc, as the secretary of Bilingual Program. Great thanks to Drs. Rahmat Nauli, M.Si., Prof. Dr. Retno Dwi Suyanti, M.Si., Drs. Ajat Sudrajat, M.Si., as the expert lecturer to standardize the module. And also thanks to Sir Syamsuddin as bilingual staff for his helping in administrative assistance and kindness.

The author’s gratitude also to all of students who have rendered their time to standardize the module as a sample of research, the student in Bilingual Chemistry Education Class from Grade 2012, 2013, 2014, and 2016 who have given their helping and their support to finishing this research.

The deepest and special gratitude, appreciation and love to my wonderful parents N. Manihuruk and S. Girsang for their countless love, supports, prays, motivation and careness and also to my beloved sisters, Devita Sari Manihuruk, then to my beloved brother Roni P Manihuruk for their supports. And also special
thanks to my beloved auntie Sri Ulina Girsang and Rico Silalahi for their loves and great motivations.

Special thanks also goes to my friends Lisnawati Tumanggor, Rina Sitindaon, Hariaty Purba and Nova (Bil Chem’12) and also for thesis friends Sri, Hariaty, Umi, Devi, Aria, that have accompany me during the research. I also would like to thanks for all of my friend in BILINGUAL CHEMISTRY 2012, and everyone who cannot be mentioned his/her name for their support and frriendship during my academic years.

Finally, the author hopes this thesis would be useful for everyone who like to explore more about the learning material and the innovation and integration to learn chemical equilibrium notably and chemistry generally. May God bless us forever.

Medan, June 2016

The author,

Elvianna Uli Manihuruk
