

## **CHAPTER V**

### **CONCLUSION and SUGESTION**

#### **5.1. Conclusion**

After done the calculation data of this research and done the hypothesis test, the researcher can conclude that:

The students learning outcome can improved by using Scramble Learning Tool by an increasing of students learning outcome 50 % and the students spelling ability and vocabulary development can improved by using Scramble Learning Tool by an increasing 34,17%.

#### **5.2. SUGGESTION**

Based on the resultand the research conclusion, so the researcher have some suggestion namely:

1. For the next researcher that want to researched more about Scramble Learning Tool, the researcher suggested to be more pay attention about ” natural ” part(in this research the mother tongue in karo distrix) to optimize the increasing of students learning outcome and students spelling ability and vocabulary development.
2. In conducting this research need the patience to guidance the students and the timing set in the teaching learning process and also the class controlling so it can arousing the students during the teaching learning process in the class and it can improve the students learning outcome and students spelling ability and vocabulary development.
