

CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

Based on the result of the data analysis and discussion, the researcher concludes that using Cooperative Integrated Reading and Composition (CIRC) significantly affects the students' achievement in reading narrative, since students' achievement in reading narrative text who taught by using Cooperative Integrated Reading and Composition (CIRC) is higher than taught by using discussion method.

B. Suggestions

Based on the conclusion given, the researcher gives some suggestions for those who are interested in teaching reading as follows:

1. To the English teacher: applying Cooperative Integrated Reading and Composition (CIRC) method to the teaching-learning process.
2. To the students: practicing Cooperative Integrated Reading and Composition (CIRC) method will give you invaluable benefit because it helps you to concentrate your attention to the reading which will guide you to comprehend reading text much better.
3. To readers: applying Cooperative Integrated Reading and Composition (CIRC) method in reading will be useful because it helps you to focus to what you are going to read.
