

## ABSTRACT

**NURHAMIDAH. 2113121053. *The Effect of Word Webbing on Students' Vocabulary Achievement in Writing Descriptive Text. A Thesis. English Department. Faculty of Arts and Language. State University of Medan.***

The objective of the study is to find whether Word Webbing significantly affected the students' vocabulary achievement in writing descriptive text in Pesantren Muhammad Saman in Diski. The study dealt with classroom research which was conducted three meetings. The number of students were 61 students both control and experimental group. The data of the test was obtained through cloze test. The data was analyzed by comparing the mean between experimental and control group. In testing the difference of mean between two groups, the researcher used t-test formula. The finding showed that the Word Webbing significantly affected the students' vocabulary achievement. The data was obtained by finding the calculation of  $t_{\text{observed}}$ . It showed that the  $t_{\text{observed}} (9.1) > t_{\text{table}} (2.0)$  with  $\alpha = 60$  meaning null hypothesis ( $H_0$ ) was rejected and alternative hypothesis ( $H_a$ ) was accepted.
