

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

In this chapter, the writer presents the conclusions and suggestions dealing with the data analysis of the research.

A. Conclusions

Based on the data analysis that has been presented in the previous chapter, the writer concludes this study based on the problem of the study. They can be seen as follows:

1. All types of syntactical errors are available on that thesis analysis. Based on the surface strategy taxonomy analysis, the result of the analysis shows that the total number of errors in syntax is 387. They are 156 sentences errors of omission, 46 sentences errors of addition, 114 sentences errors of misformation, 19 sentences errors of misorder and 52 sentences errors of transformation.
2. The most dominant type of syntactical error in the six theses is omission type. Within the errors of omission, omission of third singular inflection to show the agreement of subject. The errors found show the students often make errors in forming verb (agreement of subject and verb) in sentences.
3. the errors found are small but significant

B. Suggestions

Based on the significances of the study, this study aims to give benefit contribution as the following:

1. Students, this study will give new information that will be useful for their learning process of syntax field. They also know what aspect in grammar which is difficult for them, so they can improve their studying. .
2. Researchers who are interested in the same research to study and analyze the syntax field deeply. The writer hopes that the next researchers analyze the other aspects, which are not covered in this study yet, it could be in writing text with each genre, writing application letter, or other writings.
3. Proof readers, this study is useful so that they can help the other researchers to correct the writing's structures
