

CHAPTER V

CONCLUSION & SUGGESTION

5.1 CONCLUSION

Based on result of research, the conclusion is :

1. The develop chemical teaching materials based on science literation on Salt Hydrolysis for grade XI is 89,84 %.
2. Student Learning Outcomes that taught by Module Based On Science Literation with learning module is significant higher than student learning outcomes taught by Module in the School on subject salt hydrolysis.
3. The effectiveness of increasing student learning outcomes in chemistry that taught by Module Based On Science Literation is 71%, but effectiveness of student learning outcomes that taught by Direct instruction method that is 50% .

5.2 SUGGESTION

Based on result of research, the conclusion is :

1. For teacher, can Module Based On Science Literation as a alternative to increasing student learning outcomes especially in chemistry lecture.
2. For other researcher, that will be doing research can using this research as comprehend in increasing student learning outcomes of student especially in chemistry lecture.
