

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

After analyzing the data, the writer draws the conclusion that the students' existing reading materials are inappropriate with their program since the materials are too general and not related to their program. They find it difficult to comprehend the passage and the vocabularies which eventually bring them to be passive learners. They want to have topics or themes of passages which are appropriate to their program, Information Technology Program, in order to ease them in comprehending the materials. The solution for them is by developing new reading materials. These new materials are based on their program which consist of passages about computer and animation software as well as validated by experts.

#### B. Suggestions

Based on the above conclusions, the writer suggests that stakeholder, teacher and the students should do the need analysis regularly to meet the most appropriate and best materials for the students. Due to ESP is always followed by the need analysis to relate the students' needs with the materials. Also, the materials should be based on the students' program as well as continuously developed and improved to gain the students' achievements.
