ABSTRAK

Penelitian ini bertujuan untuk mengetahui perbandingan hasil belajar siswa menggunakan model pembelajaran *Teams Games Tournament* dengan *Numbered Head Together* di kelas VIII SMP N 45 Medan T.P 2016/2017. Populasi penelitian adalah seluruh siswa kelas VIII. Sampel dipilih dengan menggunakan teknik *Purposive Sampling*. Hasil belajar siswa yang menggunakan model *Teams Games Tournament* pada materi sistem pencernaan pada manusia memiliki rata-rata lebih tinggi (77,07) dibandingkan hasil belajar siswa yang menggunakan model *Numbered Head Together* (69,47). Hal tersebut dibuktikan melalui pengujian hipotesis dengan menggunakan uji t dan taraf kepercayaan $\alpha = 0,05$. Dimana $t_{hit} > t_{tab}$ (2,39 > 1,99).

Kata Kunci: Hasil Belajar Siswa, *Team Games Tournament* (TGT), *Numbered Head Together* (NHT)

ABSTRACT

This study purpose to determine the comparison of students learning achievement which using *Teams Games Tournament* learning model and *Numbered Head Together* learning model on human digestive system matterial in grade VIII SMP N 45 Medan A.Y 2016/2017. The population of this study was all of grade VIII. Sample of this study choose by applying purposive sampling. Students learning achievement with using *Teams Games Tournament* learning model on human digestive system matterial has higher average value (77,07) than average using students learning achievement with using *Numbered Head Together*. It proof by testing the hypothesis by using t-test and the level of confidence $\alpha = 0,05$. Where $t_{count} > t_{table}$ ($2.39 > 1.99$)

Key Word: *Students Learning Result, Teams Games Tournament (TGT), Numbered Head Together (NHT)*
