

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusions

After analyzing the types of questions based on the research findings and discussion in the previous chapter, it could be drawn the conclusion as follows:

1. The students used the referential and display questions in the classroom.
2. The factors affecting students' questioning power are consisted of three factors namely personal factor such as self-esteem, confidence, social factor, and the materials that could be hard to understand.

B. Suggestions

1. The teacher needs to create good class conditions to minimize the hindering factors for students' questioning power in the class.
2. The findings of this research can be used as a reference to give better understanding for the future researchers, the next researcher may provide the additional information and comparison that might be relevant to the study.
