

ABSTRAK

Rozi Meswandi : *hubungan hasil belajar pengetahuan dasar teknik mesin (pdtm) dan pendidikan kewirausahaan dengan minat berwirausaha dalam bidang pengelasan pada siswa kelas XI program keahlian teknologi dan rekayasa Smk Negeri 1 Percut Sei Tuan Tahun Ajaran 2017/2018 Skripsi.* Fakultas Teknik Universitas Negeri Medan. 2018

Visi dan misi SMK adalah menempa karakter lulusan yang minat berwirausaha dalam bidang jurusannya masing-masing, namun beberapa lulusan tidak semuanya dapat disalurkan ke dunia berwirausaha. salah satu faktornya penyebab lulusan SMK masih menganggur karena faktor minat berwirausaha. Oleh sebab itu, penulis ingin mengungkapkan bagaimana minat berwirausaha yang dimiliki siswa SMK Negeri 1 Percut Sei Tuan Program Keahlian Teknologi dan Rekayasa. Tujuan penelitian ini adalah (1) mengetahui hubungan antara hasil belajar pendidikan dasar teknik mesin dengan minat berwirausaha, (2) mengetahui hubungan pendidikan kewirausahaan dengan minat berwirausaha, (3) mengetahui hubungan antara hasil belajar pendidikan teknik dasar teknik mesin dan pendidikan kewirausahaan. Objek penelitian ini adalah siswa kelas XI SMK Negeri 1 Percut Sei Tuan yang berjumlah 89 orang. Rancangan penelitian menggunakan pendekatan korelasional, data dianalisis menggunakan korelasi *pearson product moment*, dan regresi linear ganda. Hasil penelitian mengungkapkan bahwa : (1) terdapat hubungan antara hasil belajar pendidikan dasar teknik mesin dengan minat berwirausaha dengan koefisien korelasi ($r = 0,765$) dengan level signifikansi alpha sebesar 0,05. (2) terdapat hubungan pendidikan kewirausahaan dengan minat berwirausaha dengan koefisien korelasi ($r = 0,752$) dengan level signifikansi alpha sebesar 0,05. (3) terdapat hubungan positif antara hasil belajar pendidikan teknik dasar teknik mesin dan pendidikan kewirausahaan dengan koefisien korelasi ($r = 0,782$) Hasil penelitian menunjukkan bahwa hasil belajar pendidikan teknik dasar teknik mesin (pdtm) dan pendidikan kewirausahaan mempunyai hubungan yang signifikan terhadap minat berwirausaha. Artinya, minat berwirausaha siswa untuk memasuki dunia pekerjaan dipengaruhi oleh faktor pendidikan teknik dasar teknik mesin (pdtm) dan pendidikan kewirausahaan siswa terhadap berwirausaha yang akan digelutinya nantinya

Kata Kunci : Hasil Belajar Pengetahuan Teknik Dasar Teknik Mesin (Pdtm), Pendidikan Kewirausahaan, Minat Berwirausaha SMK

ABSTRACT

Rozi Meswandi : the relationship of the learning outcomes basic knowledge of mechanical engineering with an interest in entrepreneurship education and entrepreneurship in the field of welding on a grade XI engineering and technological expertise program SMK Negeri 1 Percut Sei Tuan school year 2017/2018 **Thesis**. Engineering Faculty Of The State University Of Medan. 2018

Vision and mission of CMS is to forge the character of graduates that entrepreneurship interest in their respective areas of their Department, but some graduates not everything can be transmitted to Earth entrepreneurship. one of the factors the causes of CMS graduates still unemployed because of the factor of interest in entrepreneurship. Therefore, the author would like to express how entrepreneurship interest owned student SMK Negeri 1 Percut Sei Tuan Program Technology and engineering Expertise. The purpose of this study is to (1) find out the relationship between the learning outcomes of primary education in mechanical engineering with an interest in entrepreneurship, (2) the relationship of entrepreneurial education with an interest in entrepreneurship, (3) knowing the relationship between the results of the study basic engineering education in mechanical engineering and entrepreneurial education. The object of this research is the grade XI SMK Negeri 1 Percut Sei Tuan of 89 people. The design of the studies using the correlation approach, the data were analyzed using pearson product moment, correlation and linear regression. Results of the study revealed that: (1) there is a relationship between the learning outcomes of primary education in mechanical engineering with an interest in entrepreneurship with correlation coefficient ($r = 0.765$) with significance level alpha of 0.05. (2) there is a relationship with an interest in entrepreneurship education entrepreneurship with correlation coefficients ($r = 0.752$) and significance level alpha of 0.05. (3) there is a positive hubunan between the results of learning the basic techniques of mechanical engineering education and entrepreneurship education with koefesien correlation ($r = 0.782$) research results showing that the results of learning the basic techniques of mechanical engineering education and education entrepreneurship has significant relationship towards entrepreneurship interest. Meaning, entrepreneurship interest students to enter the world of work is influenced by factors of basic engineering education in mechanical engineering and students against education entrepreneurship entrepreneurship investments that will later
