

## HAPTER V

### CONCLUSIONS AND SUGGESTIONS

#### A. The Conclusion

Referring to the discussion of the research in previous chapter, it can be concluded that:

The teaching media developed in this study were pictures about person, thing, and animal. The teaching media were developed through 6 phases, they were; 1) gathering information and data, 2) Analyzing data, 3) Designing media based on the needs analysis, 4) Validating the new media by experts (English lecturer and English teacher), 5) Revising the new media based on experts' suggestions, and 6) Revised- developing teaching media (final product). The media were developed based on the students' need that got through interview and questionnaires. The data has got from the participants was analyzed by using rating scale. The media developed based on the need analysis then revised by the media experts. The result of the product from the first validator's evaluation was 70% (fair) and from the second validator's evaluation was 80% (good). It means that the media is suitable to be used in teaching writing descriptive text at eighth grade students at SMP Prayatna Medan.

## B. Suggestions

By considering the conclusion mentioned above, the writer suggests that the teaching media is very important to support the teaching learning process especially in writing descriptive text. The writer mentions some suggestions as follow:

1. For the reader

It's expected to be a reference for the readers who want to conduct their studies that related to this research.

2. For Teacher

In teaching descriptive text, teachers need media to help the students in imagining and gaining their idea. Teachers should use media that can illustrate things well. The illustration will help the students to imagine and think well, so that the learning activity will be effective..
