

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

After analyzing logico-semantic relation in *hula-hula*'s utterances (H), the findings and the discussion can be concluded as the following:

1. From 10 types of logico-semantic relations, there were 9 types were used in *mangulosi* Batak Toba wedding ceremony by the *hula-hula*, they were alternately hypotactic enhancement (38.46%), hypotactic elaboration (16.34%), paratactic enhancement (13.46%), paratactic elaboration (9.61%), hypotactic locution (7.69%), paratactic extension (6.73%), hypotactic extension (3.84%), hypotactic idea (2.88%), paratactic idea (0,96%). There was one type namely paratactic locution that was not found in the data.

2. The logico-semantic relations realized in *hula-hula*'s utterances by 5 ways, they were alternately conjunction (49.03%), verb (43.26%), preposition (3.84%), prepositional clause (2.88%), and adverbial clause (0.96%). The realization that used by *hula-hula*'s utterances (H) to make logical connection between the clauses while delivering their utterances. However the realization could determine the types of logico-semantic relations.

B. Suggestions

Therefore, several suggestions from the researcher to readers towards logico-semantic relations, as presented below:

1. By reading this research, It is recommended for young generations to comprehend the logico-semantic relations in traditional Batak Toba wedding ceremony.
2. The study is expeted to make readers improve the knowledge in Bataknese language so that they can get the meaning from the speaker's utterances in Batak Toba wedding ceremony
3. It is also hoped this research can help the researcher to make farther research about the meaning speaker's utterances in Batak Toba wedding ceremony.
