

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### 5.1 Conclusions

Based on the analysis, the conclusions were stated as the following:

1. In this study, the characteristics of the language used by male and female in writing narrative text focused on lexicogrammar feature of narrative text by Peter Knapp (2005). From the data, it was found that the characteristic of language in writing narrative text consist of action verbs, mental verbs, temporal connective, repetition, past tense, adjective, conjunction and modality
2. There are different way in the linguistic characteristics of male and female in writing narrative text. It is realized that male students dominant to use action verb in writing, while female students dominant to use mental verb.
3. The reason for the using linguistic characteristics of male and female in writing narrative text. Male students purpose is to contest, they give information by writing an action or behaviour to say the objective one. Female purpose is to communication, they like to express feeling and thinking and tell their opinions.

## 5.2. Suggestion

In relation to the conclusions, suggestions are offered as the following:

1. Since the subjects of this study are limited to the lexicogrammar of narrative text writing by male and female students. It is suggested that further research with the different genres such as argumentative, expository and others in order to have further data or finding which may support or weaken the findings of the present study.
2. It is suggested that further researcher consider more variant topics given to enrich the findings of linguistic characteristics used by male and female students. It also suggested to students increase their ability in writing and conveying their experience through writing text in variant of genres.
3. Based on the findings, this study is focused on narrative text writing, nature and gender, it is suggested to the further researchers to point out the other factors to get deeper findings, such as ethnicity, family background, age, higher level of education, and etc. Based on the findings, this study is suggested to the readers that have different facts in the society as the comparison on the theory.
