

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the result and discussions, can be concluded that :

1. Perception level of first year science students on IQF Curriculum based assignments has good category with average value is 26,15.
2. Learning achievement of first year science student on general biology course has very good category with average value is 85,6.
3. There is a relationship between the perception of first year science students on IQF Curriculum based assignments with the learning achievement of General Biology course.
4. Contribution of student's perception on student learning achievement is 7%.

5.1 Suggestion

From the above conclusion, some advice that can be given concerning this research is:

1. Need to make the books on the IQF Curriculum based assignment system so that students more easily understand each task given by the lecturers and the tasks that are gathered can be in accordance with the expected.
2. Considering the large number of semester subjects and the large number of lecture assignments, it is necessary to reduce the number of assignments by grouping assignments for the allied subjects so that the quality of student assignments can increase.
