

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the research, can be concluded :

1. Android-based student worksheet was proper according to the validation of lecturers and teachers.
2. Hypothesis test stated that H_a accepted which means learning achievement in experiment class that used android based student worksheet was higher than control class that used their student worksheet.
3. The student motivation in the experiment class categorized as very good while in control class was good.

5.2 Suggestion

Based on the result of research can be suggested :

1. Chemistry teachers expected to apply the android based student worksheet on an acid-base topic in the learning process to increase student learning achievement.
2. The next researcher is recommended to research other topics and with different variations so it can increase student learning achievement in another topic.
3. The next researcher is suggested to create students' worksheet exercise which can be concluded by the student.
