

## CHAPTER V CONCLUSION AND RECOMMENDATION

### 5.1. Conclusion

The conclusions that can be drawn from this study are as follows:

1. The quality of textbook published by Grafindo Media Pratama on metabolism topic based on the perception of biology's teachers in SMA Negeri 1 Tebing Tinggi in the aspect of content feasibility and presentation aspects is very good with the percentage in the aspect of content feasibility that is 79% and the percentage of presentation aspects is 80%.
2. The quality of textbook published by Yrama Widya on metabolism topic based on the perception of biology's teachers in SMA Negeri 1 Tebing Tinggi in the aspect of content feasibility and presentation aspects is very good with the percentage in the aspect of content feasibility which is 77% and the percentage aspect of presentation is 82%.
3. Based on the results of the research data on the aspect of content feasibility, the average percentage in the textbook published by Grafindo Media Pratama is higher than the textbook published by Yrama Widya. While on the presentation aspect, the average percentage in the textbook published by Yrama Widya is higher than the textbook published by Grafindo Media Pratama.

### 5.2. Recommendation

Based on the conclusions above, the researcher proposes the following suggestions:

1. Students should choose quality textbooks for reference books and use other references to support learning.
2. Teachers should choose textbooks that have good quality and then recommend them to students as learning media so they can avoid misunderstandings on the material.

3. The author or publisher of textbooks should revise the textbook in terms of the completeness of the material, namely the completeness of basic competencies in the description of the textbook material.
4. The researcher should use all four aspects to examine the quality of the textbook in order to get better results.
