

Acknowledgements

Thesis writing is not as easy as it seems because of several factors. First, it requires serious thinking about choosing the topic to be discussed. Second, there should be a deeper understanding of the research procedures. Third, there should be enough motivation to complete the academic assignment to earn a degree. In this case, the writer realizes that completing such a task is difficult as she still lacks the knowledge to conduct a scientific research which can contribute to the development of knowledge. Despite the many difficulties she was convinced that she would be able to accomplish it by the assistance of her professional lecturers. This thesis of course would not have been completed as it is without their assistance.

On this particular occasion, the writer would like to thank her first consultant, Prof. Dr. Lince Sihombing, M.Pd, who has given her valuable time to check the contents of this thesis as well as guided her to finish it in due time. She has always provided information and advice in dealing with the procedures of doing the research. A very special appreciation and appraisal is especially directed to her for being such a wise lecturer and great care to her students.

Also, she feels obliged to thank her second consultant, Prof. Dr. Berlin Sibarani, M.Pd, for his invaluable criticism and contribution to make the thesis scientifically worthwhile as required by the state university of Medan. His sincere attention to her is highly appreciated. Similarly, she wishes to express her thanks to Prof. Dr. Busmin, M.Pd, Head of the English Applied Linguistics Study Program for his professional guidance and support in settling the administrative procedures. Also, she is obliged to thank her husband Rajes Tampubolon, for his sincere attention and love to her needs so that she could achieve the success in completing her studies at State University of Medan.

Next, she should express her gratitude to her beloved mother Loide Br Pangaribuan and parents-in law Pdt. K. Tampubolon and L. Br Silaban who have given her the best education to be more mature and responsible for the future life. Their never-ending love is the inspiration that has led her to realize her power in solving any problem in her life. She is very much obliged.

Further, her thanks also go to Dra. Renata Nasution, M.Si, Principle of SMA Negeri 19 Medan, for her cooperative attitude in allowing her to continue her studies and conduct the research in the school. All the writer's friends and other lectures whose names are not mentioned her should also receive his appreciation for their encouragement that has made her achieve the success.

Finally, the thesis is dedicated to those who wish to learn more about reading comprehension. All the errors in this thesis are her sole responsibility.
