

ACKNOWLEDGEMENT

Praise and thank the authors pray to God Almighty, for the blessings and love that gives wisdom and health to the author so that this thesis can be completed properly. Thesis entitled "The Implementation of Project Based Learning To Improve Scientific Process Skill On Respiratory System for Grade XI MIA SMA Negeri 2 Tebing Tinggi Academic Year 2019/2020" was arranged to obtain a bachelor's degree in biology education, Faculty of Mathematic and Natural Sciences, Universitas Negeri Medan.

The preparation of this thesis has gone through a long tiring road and various stages in accordance with the standard procedures in force at FMIPA Unimed, starting from the stage of determining research topics, preparing and proposing seminars, conducting research, preparing thesis, and maintaining the thesis examination. The selection of research topics is based on what is happening at school today, where students lack scientific process skills. Science process skills really need to be especially for students who are majoring in science, so that they can further improve their skills starting from observing to communicating

In this opportunity, a million thanks are delivered to Mrs. Dra. Meida Nugrahalia M.Sc as the thesis supervisor who has provided guidance and suggestions that support and take the time to the writer from the beginning of the preparation of the proposal to the final stage of writing this thesis. Thank you also to Dr. Hasruddin M.Pd, Mrs. Dra. Cici Suriani M.Si and Mr. Wasis Wuyung Wisnu Brata S.Pd, M.Pd as the examiner lecturer who provided input and suggestions ranging from planning to completion of this thesis. Thank you to Drs. Zulkifli Simatupang M.Pd as the academic supervisor and to all the lecturers and staff of the FMIPA Unimed department and bilingual staff. Then the authors also thanked the headmaster, vice headmaster and biology teacher at SMA Negeri 2 Tebing Tinggi who gave permission and helped during the research.

The author realizes this thesis is not perfect. Therefore, the author expects criticism and suggestions and the authors hope this thesis can be useful for related parties, especially in learning in schools.
