

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

The researcher concludes that there had been no digital media used in the teaching of recount text in MAN 2 Deli Serdang. The students found it difficult to produce a recount text and they wanted to be more active in learning recount text. They also wanted to use an interesting digital media to learn recount text with. Hence, researcher got intrigued to develop a digital media that can be used to teach recount text for these students. The development of the media was conducted by using Digital Scrapbook which followed the R & D phases by Borg & Gall (2003:569). The steps are (1) Gathering Data and Information; (2) Need Analysis; (3) Designing Media; (4) Validating by Experts; (5) Revising; (6) Final Product. After the media had been designed or developed, it was validated by two experts. There were 4 aspects that were judged by the validators which were linguistic, process, product and content, and layout. The average score by the first validator was 87.2 which means that the media is valid, and the average score by the second validator was 91.2 which means that the media is very valid as well.

## **B. Suggestion**

After the analyzing the data and developing the digital media product.

Here are some suggestions by the researcher:

First, teachers should consider students' needs and the benefits of using media in teaching so that it would help teachers in varying teaching and learning activities in the classroom. Next, in general, teachers of English, and particularly the teacher at MAN 2 Deli Serdang can use the developed digital scrapbook for teaching writing. Second, students should use media in learning recount text to increase their motivation and also ability in writing recount text. Third, other researchers can conduct research other aspects of recount text and writing that can be analyzed and be the base of future product developments to help solve the problems. This research can also be the reference to develop other digital media or other more enhanced version of digital Scrapbook by using Canva.
