

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

In order to answer the problem of the study, the researcher concluded that the online method was implemented by creating a WhatsApp Group to communicate with the students and their parents, making lesson plans based on the current situation, preparing to teach material and assignments, explaining the material using a video, send assignments with Covid-19 content through Quipper School application and WhatsApp Group.

Meanwhile, the offline method was only used for collecting hardcopy assignments because face-to-face teaching and learning was not permitted. The conclusion was based on the observation during teaching and learning process by using the online and offline methods of teaching English to grade XI students of SMA Swasta Istiqlal Delitua during the pandemic.

B. Suggestion

Based on the research had been conducted by the writer, the writer would like to suggest that teachers should be more able to use offline methods to assess students' speaking skills because during the learning process, either online or offline, students were only focused on reading and writing skills.
