

ABSTRAK

HEBRON TOGATOROP, NIM 51431121009 : *Pengaruh Motivasi Berprestasi Dan Locus Of Control Terhadap Hasil Belajar Mata Pelajaran Pekerjaan Dasar Teknik Perkapalan Kelas X TPK SMK Bahari Hangtuh Belawan T.A 2020/2021*. Skripsi. Fakultas Teknik. Universitas Negeri Medan. 2021.

Penelitian bertujuan mengetahui besar hubungan antara motivasi berprestasi dan locus of control dengan hasil belajar pdtm kelas X SMK Bahari Hangtuh Belawan. Penelitian ini menggunakan pendekatan *penelitian kuantitatif* dengan metode penelitian korelasional, menggunakan instrumen angket model Likert dan hasil belajar.

Sampel penelitian berjumlah 78 siswa, cara pengambilan sampel dalam penelitian ini menggunakan metode Kerjcie Morgan (Isaac dan Michael) dengan tingkat kesalahan = 5%. Uji validitas instrumen menggunakan koefisien korelasi Product Moment, dan uji reliabilitas menggunakan Alpha Cronbach dan Koefisien Kesepakatan. Hasil penelitian di analisis menggunakan koefisien korelasi Product Moment, Korelasi Parsial, dan Korelasi Ganda dengan bantuan program SPSS 25.0.

Hasil penelitian menunjukkan; (1) terdapat hubungan signifikan antara motivasi berprestasi dengan hasil belajar pdtp kelas X SMK Bahari Hangtuh Belawan. Dengan persamaan regresi $\hat{Y} = 60,108 + 0,318 X_1$, diperoleh nilai koefisien korelasi sebesar 0,495; (2) terdapat hubungan signifikan antara locus of control dengan hasil belajar PDTP kelas X SMK Bahari Hangtuh Belawan. Dengan persamaan regresi $\hat{Y} = 58,368 + 0,324 X_2$, diperoleh nilai koefisien korelasi sebesar 0,491; (3) terdapat hubungan signifikan antara motivasi berprestasi dan locus of control dengan hasil belajar siswa kelas X SMK Bahari Hangtuh Belawan. Dengan persamaan regresi $\hat{Y} = 47,432 + 0,239 X_1 + 0,242 X_2$, diperoleh koefisien korelasi sebesar ($R = 0,603$) dan nilai pengaruhnya 36,4%. Hasil analisis regresi nilai $F_h = 21,421$ dan harga $F_t = 3,118$ pada taraf signifikan 5%, sehingga $F_h > F_t$ ($21,421 > 3,118$). Dengan demikian variabel motivasi berprestasi, locus of control, dan hasil belajar mata pelajaran PDTP memiliki hubungan yang signifikan.

Kata Kunci : Motivasi Berprestasi, Locus Of Control, Hasil Belajar PDTP

ABSTRACT

HEBRON TOGATOROP, NIM 51431121009: The Effect of Achievement Motivation and Locus Of Control on Learning Outcomes of Basic Marine Engineering Class X TPK SMK Bahari Hangtuh Belawan T.A 2020/2021. Thesis. Faculty of Engineering. Medan State University. 2021.

This study aims to determine the relationship between achievement motivation and locus of control with learning outcomes in class X at SMK Bahari Hangtuh Belawan. This study uses a quantitative research approach with correlational research methods, using a Likert model questionnaire instrument and learning outcomes.

The research sample amounted to 78 students, the sampling method in this study used the Kerjcie Morgan method (Isaac and Michael) with an error rate of 5%. The instrument validity test uses the Product Moment correlation coefficient, and the reliability test uses Cronbach's Alpha and Coefficient of Agreement. The results of the study were analyzed using the Product Moment correlation coefficient, Partial Correlation, and Multiple Correlation with the help of the SPSS 25.0 program.

The results showed; (1) there is a significant relationship between achievement motivation and learning outcomes for class X PDTP at SMK Bahari Hangtuh Belawan. With the regression equation $\hat{Y} = 60.108 + 0.318 X_1$, the correlation coefficient value is 0.495; (2) there is a significant relationship between locus of control and learning outcomes in class X SMK Bahari Hangtuh Belawan. With the regression equation $\hat{Y} = 58.368 + 0.324 X_2$, the correlation coefficient value is 0.491; (3) there is a significant relationship between achievement motivation and locus of control with student learning outcomes in class X SMK Bahari Hangtuh Belawan. With the regression equation $\hat{Y} = 47.432 + 0.239 X_1 + 0.242 X_2$, the correlation coefficient is ($R = 0.603$) and the effect value is 36.4%. The results of the regression analysis of the value of $F_h = 21.421$ and the value of $F_t = 3.118$ at a significant level of 5%, so that $F_h > F_t$ ($21.421 > 3.118$). Thus, the variables of achievement motivation, locus of control, and learning outcomes of PDTP subjects have a significant relationship.
