

LIST OF FIGURES

Figure 2.1.	Structures associated with the respiratory system.....	15
Figure 2.2.	Schematic of the respiratory system displayed by the upper and lower respiratory tract region.....	16
Figure 2.3.	Lateral wall of right nasal cavity.....	16
Figure 2.4.	The pathway of air from the nose to the larynx.....	17
Figure 2.5.	The pharynx and its subdivisions into the nasopharynx, oropharynx, and laryngopharynx.....	17
Figure 2.6.	The larynx.....	18
Figure 2.7.	The trachea and some of its related structures.....	19
Figure 2.8.	Branching of airways from the trachea.....	19
Figure 2.9.	Surface anatomy of the lungs.....	20
Figure 2.10.	Changes in chest size during inspiration.....	22
Figure 2.11.	Lung volumes and capacities.....	23
Figure 3.1.	Research procedure.....	50
Figure 4.1.	Histogram Data Value of Student Collaboration Skills who were taught with the GI Learning Model.....	56
Figure 4.2.	Histogram Data Value of Student Collaboration Skills who were taught with the Conventional Learning Model.....	58
Figure 4.3.	Diagram of the Comparison of the Values of Collaborative Skills Aspects between Students who were taught by the GI Learning Model and Students who were taught by the Conventional Learning Model.....	58
Figure 4.4.	Histogram of Value Data Mastery of the Concept of the Human Respiratory System by Students who were taught with the GI Learning Model.....	60
Figure 4.5.	Histogram of Value Data Mastery of the Concept of the Human Respiratory System by Students who were taught with the Conventional Learning Model.....	62
Figure 4.6.	Diagram of the Comparison of Cognitive Levels of Concept Mastery of Human Respiratory System between Students who were taught by the GI Learning Model and Students who were taught by the Conventional Learning Model.....	62
