

CHAPTER V CONCLUSION AND SUGGESTION

5.1 Conclusion

The conclusions obtained from this development are:

1. The stages of Canva media development consist of several stages, namely choosing a theme according to the material, designing media, and presenting media to students.
2. Based on the calculation of the results of the media test, 70% who meet the criteria and 74% of experts who meet the criteria are valid.
3. based on the questionnaire they filled, the responses of students X IPS 2 MAN 1 Deli Serdang to the learning video were very interested and helped students understand the material presented by getting a response of 83,37%

5.2 Suggestion

Some suggestions that can be given for the development of Canva media in quadratic equation material are:

1. The learning media only presents quadratic equation material for class X IPS 2 MAN 1 Deli Serdang, so it is hoped that other materials can be developed.
2. Suggestions that can be given by researchers are that the developed media can be used to support learning both face-to-face and distance or online learning for students of class X IPS 2 MAN 1 Deli Serdang.
