Dear R. Restu,

We have received reviewer's comments on the manuscript language.
Please adjust your paper according to the comments and requests provided in the document.

1. I did not find specific comments of table 2, so I was unable to gain a full comprehension of the authors perspectives or arguments. This could have helped change some of my opinions. Some comments have been addressed very well.
2. There is a mismatch between what you will be trying to measure and your own stated objectives. Therefore, you really need to work on reshaping your argument or redefining path analyses were carried out; the first path is the three equation models, and the second path is the one equation model.

Send your paper back to us within 7 days from now.
