The Influence of Mount Sinabung Eruption on the Geothermal in Tinggi Raja Simalungun

Dear Mr. Tampubolon,

Thank you for submitting your manuscript to Physics and Chemistry of the Earth.

I am pleased to inform you that your manuscript has been accepted for publication.

My comments, and any reviewer comments, are below.

Your accepted manuscript will now be transferred to our production department. We will create a proof which you will be asked to check, and you will also be asked to complete a number of online forms required for publication. If we need additional information from you during the production process, we will contact you directly.

Open Access: In accordance with Funding Body requirements, Elsevier does offer alternative open access publishing options. Visit <https://www.elsevier.com/journals/cretaceous-research/0195-6671/open-access-options> for full information.

We appreciate you submitting your manuscript to Physics and Chemistry of the Earth and hope you will consider us again for future submissions.

We encourage authors of original research papers to share the research objects – including raw data, methods, protocols, software, hardware and other outputs – associated with their paper. More information on how our open access Research Elements journals can help you do this is available at [https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec\\_em\\_research\\_elements\\_email](https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec_em_research_elements_email).

Kind regards,  
Hongbo Su  
Editor-in-Chief

Physics and Chemistry of the Earth

Editor and Reviewer comments:

Reviewer #2: I have revised the manuscript, entitled: The influence of Mount Sinabung Eruption on the Geothermal in Tinggi Raja Simalungun. My opinion is that the quality of the manuscript, compared to the first version, has been greatly improved, considering all the suggestions of the reviewers. The paper appears well constructed and well documented, and the results encourage the application of the method in other areas with different geo-environmental features to verify its reliability. Hence, it is recommended that the manuscript be accepted for publication in its present form.

Best regards
