Dear Rahma Dewi,

We have received reviewer's comments on the manuscript language.  
Please adjust your paper according to the comments and requests provided in the document.

Reviewer 1: Here's a critical review of the revised manuscript entitled "The Effect of Manipulative Games to Improve Fundamental Motor Skills in Elementary School Students";

1. The introduction of the study must include relevant information about the importance of physical education, sports, and health in schools. It should highlight the role of fundamental motor skills in the development of body posture and emphasize the curriculum's focus on physical activities related to play. This addition will strengthen the study's rationale and establish a clearer connection to the research topic.
2. The paper needs to incorporate references to support many of the statements made. It would be beneficial to provide more recent references to ensure the information presented is up-to-date. Additionally, providing specific details about the cited studies would enhance the credibility of the information.
3. The manuscript discusses the shift from manual games to digital equipment games and mentions that children nowadays prefer digital entertainment. While this information is relevant, it is not directly connected to the study's aim of improving motor skills through manipulative games. It would be helpful to establish a clearer link between the changing play activities and the need for interventions such as manipulative games to enhance motor skills.
4. The manuscript should briefly mention the impact of the COVID-19 pandemic on student activities, particularly the increased use of smartphones for online learning and entertainment.
5. Finally, the manuscript lacks clear section headings, making it difficult to identify the different sections and their respective content. Adding headings would enhance the organization and readability of the text.

Reviewer 2: The authors inserted a substantial effort into writing this study. However, it has room for improvement in certain areas like;

6. The paper lacks a clear progression of ideas and arguments. It jumps between discussing the impact of game applications on physical activity, the importance of games for elementary students, and the mastery of fundamental movement skills without establishing clear connections between these topics. It would be helpful to provide a more cohesive and logical flow to guide the reader through the text.
7. The description of the research method is quite brief and lacks important details. It would be beneficial to provide more information about the sample size, the selection process for the sample, and the specific manipulative games used in the study.
8. The study contains some grammatical errors and awkward sentence constructions. Proofreading the text for clarity, coherence, and grammar would improve its overall quality.
9. The paper mentions conducting a t-test but does not provide information on the variables analyzed, the hypothesis tested, or the statistical significance of the results. Including this information would help readers understand the statistical analysis and the findings' strength.
10. The paper mainly focuses on summarizing the results by critically evaluating the study's methodology, data analysis, or limitations. However, the appropriateness of statistical tests used and potential alternative explanations for the findings are required.

## Response to Reviewer 1

Dear Rahma Dewi,

The paper revised version is good.  
We are sending you the reviewers' comments for more upgradation of paper.

Reviewers' comments

The authors have done a great job of revising; however, here are some minor points they must consider before acceptance of this manuscript.

- Mentioning the research design's ethical considerations and potential limitations would strengthen the methodology section.
- The paper lacks important contextual information, such as the purpose of the study, research methodology, and sample size. Without these details, evaluating the significance and validity of the findings is challenging.
- The text presents some tables and figures without providing any analysis or interpretation. It would be helpful to include a discussion of the key findings and their implications, as well as any limitations or potential sources of bias.

Dear Rahma Dewi,

your paper is now scheduled in IJEMST, Vol.10, No.1, 2021 to be published at December 2021.

- Your final version is now being formatted
- DO NOT UPLOAD OR SEND ANOTHER VERSION, it cannot be taken into account.
- You are receiving this email because (according to the metadata in the system) you are the corresponding author (primary contact). However, the proof will be sent to the corresponding author given in the paper.
- On or before last week of November, 2021 you will receive a page proof from our copy-editing team
- you have 2 days to reply. If you don't respond your paper will be published as sent to you in that proof email.
- Check your SPAM and watch out for this email. It will be sent to the email that you have given IN THE PAPER (and might be different from the one of this email)
- NO MODIFICATIONS WILL BE POSSIBLE ANYMORE, ONCE YOUR PAPER IS PUBLISHED.
- Please CHECK CAREFULLY authors' names, affiliations, typos.
- Changes to the content are no longer possible, this would require a new review.

Best Regards,  
Editorial Board office,  
[ijemst@gmail.com](mailto:ijemst@gmail.com)  
<https://ijemst.net/>

DR. RAHMADEWI <rahmadewi@unimed.ac.id>
