to acjournal.nauka.nw

Dear Russian Journal of Applied Chemistry Editor,

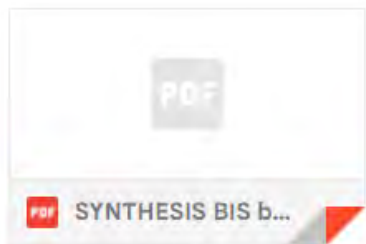

We are submitting our manuscript entitled:  
Analysis of the Bis(Benzoylacetato)Zirconium(IV) Chloride Complex Compound  
Mulliken Charge Used As A Catalyst in the Ring Opening Polymerization of e-  
Caprolactone.

Our article is about Ring Opening Polymerization of e-Caprolactone using  
Bis(Benzoylacetato)Zirconium(IV) Chloride catalyst.

We hopefully, this article can be considered to be published on Russian Journal of  
Applied Chemistry.

Warm regard

Dr. M. Yusuf  
Dept of Chemistry-Universitas Negeri Medan- Indonesia

Thu, May 26, 2022, 8:49 PM

to me

There is one small remark left on the article and you can accept:

In Table 1 please check the yields. Are they given in g or % (the monomer was taken only 2.4 g for the polymerization)?

to Светлана

Thank you very much for the reviewer that has given a review on our valuable manuscript.

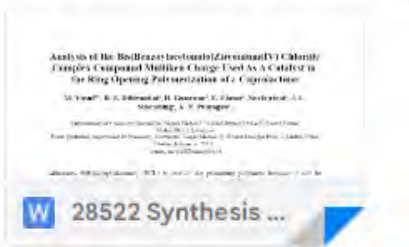

1. We have corrected the yield unit from g to % in our manuscript (Table 1).

% Yield was determined from the mass of PCL formed divided by the mass of the  $\epsilon$ -CL monomer used and multiplied by 100;

Warm regards

Dr. Muhammad Yusuf
