

CHAPTER V

CONCLUSSION AND SUGESSTION

5.1. Conclusion

Based on the results of research and discussion that has described, it can conclude that:

1. The result from validation of material expert is included in "Very feasible" category with percentage 83,33 %
2. The result from validation of educational expert are included in "Feasible" category with percentage 81,33 %.
3. The result from teachers are included in "Feasible" category with percentage 94,66 %.
4. according to student responses to individual trials, small group trials and large group trials, it was stated that the biodiversity booklet was included in the "Feasible" to be used as a student learning resource.
5. The results of the study indicate that the product developed in the form of a biodiversity booklet is effective in improving student learning outcomes.

5.2. Suggestion

Based on the research above, the authors propose several suggestions in overcoming problems in the field:

1. It is recommended that an assessment by a team of experts be carried out by at least 2 teams of experts, as a comparison in assessing the products made.
2. To get maximum results, it is necessary to do further research on a larger sample.
3. To see the effectiveness and practicality of the product, a more complete stage should be carried out.
