

## DAFTAR GAMBAR

|  |    |
|--|----|
| Gambar 2. 1 <i>Fixed Wing dan Multi Rotor</i> (Manalu, 2018) .....                           | 13 |
| Gambar 2. 2 Model 2D Hasil Pengolahan Data UAV (dokumentasi pribadi, 2020)..                 | 14 |
| Gambar 2. 3 <i>Digital Elevation</i> (Kiri), <i>Thermal</i> (Kanan). (Syahputra, 2019) ..... | 15 |
| Gambar 2. 4 Rute Penerbangan UAV (Syahputra, 2019).....                                      | 18 |
| Gambar 2. 5 Contoh <i>Overlap</i> dan <i>Sidelap</i> (Nurdinansa, 2013).....                 | 20 |
| Gambar 2. 6 <i>Orthophoto</i> (Syahputra, 2019).....   | 22 |
| Gambar 2. 7 <i>Digital Elevation Model</i> (Manalu, 2018).....                               | 25 |
| Gambar 2. 8 Kerangka Berfikir .....  | 30 |
| Gambar 3. 1 Lokasi Pengambilan Data (Google Earth, 2021).....                                | 31 |
| Gambar 3. 2 Peta Kontur dan DEM Gundaling I (Demnas, 2020).....                              | 33 |
| Gambar 3. 3 Peta Existing Gundaling I (Demnas, 2020).....                                    | 34 |
| Gambar 3. 4 Diagram Alir Penelitian.....   | 36 |
| Gambar 4. 1 Cakupan Wilayah Penelitian.....  | 42 |
| Gambar 4. 2 Rute Penerbangan Drone .....   | 42 |
| Gambar 4. 3 Pemotretan Melalui Udara .....   | 43 |
| Gambar 4. 4 Sampel Hasil Foto Udara .....  | 44 |
| Gambar 4. 5 Titik A (330 cm) .....   | 44 |
| Gambar 4. 6 Titik B (400 cm).....  | 45 |
| Gambar 4. 7 Titik C (440 cm).....  | 45 |
| Gambar 4. 8 Titik D (220 cm) .....   | 45 |
| Gambar 4. 9 Tampilan Import Photo .....  | 47 |
| Gambar 4. 10 Review Foto dan Jalur Terbang .....   | 47 |
| Gambar 4. 11 Parameter <i>Build Dense Point Clouds</i> .....                                 | 48 |
| Gambar 4. 12 Hasil Pengolahan <i>Build Dense Point Clouds</i> .....                          | 49 |
| Gambar 4. 13 Parameter <i>Build Mesh</i> .....   | 50 |
| Gambar 4. 14 Hasil Pengolahan <i>Build Mesh</i> .....  | 50 |
| Gambar 4. 15 Parameter <i>Build Texture Model</i> .....                                      | 51 |
| Gambar 4. 16 Hasil Pengolahan <i>Build Texture Model</i> .....                               | 52 |
| Gambar 4. 17 Parameter <i>Build DEM</i> .....  | 53 |
| Gambar 4. 18 Hasil Pengolahan DEM.....   | 53 |

|  |    |
|--|----|
| Gambar 4. 19 Parameter <i>Build Orthomosaic</i> .....              | 54 |
| Gambar 4. 20 Hasil Pengolahan <i>Orthomosaic</i> .....             | 55 |
| Gambar 4. 21 Hasil <i>Export Orthomosaic</i> ke Google Earth ..... | 56 |
| Gambar 4. 22 Titik A (310 cm) .....                                | 56 |
| Gambar 4. 23 Titik B (385 cm).....                                 | 57 |
| Gambar 4. 24 Titik C (419 cm).....                                 | 57 |
| Gambar 4. 25 Titik C (194 cm).....                                 | 57 |
| Gambar 4. 26 Hasil <i>Filtering DEM</i> Menjadi <i>DTM</i> .....   | 60 |
| Gambar 4. 27 <i>Cropping DTM</i> .....                             | 61 |
| Gambar 4. 28 Garis Kontur Minor dan Major .....                    | 63 |
| Gambar 4. 29 Hasil Akhir Pengolahan Garis Kontur .....             | 64 |
| Gambar 4. 30 Hasil Pengolahan <i>Topo to Raster</i> .....          | 65 |
| Gambar 4. 31 Hasil Pengolahan <i>Slope</i> .....                   | 66 |
| Gambar 4. 32 Hasil Pengolahan <i>Reclassify</i> .....              | 67 |
| Gambar 4. 33 Hasil Eliminasi dan Penghalusan Poligon .....         | 68 |
| Gambar 4. 34 Hasil Pengolahan Kelas Lereng .....                   | 69 |
| Gambar 4. 35 Hasil <i>Clip Area</i> .....                          | 70 |
| Gambar 4. 36 Data <i>Attribute Table</i> Gundaling I .....         | 71 |
| Gambar 4. 37 <i>PivotTable Fields</i> .....                        | 72 |
| Gambar 4. 38 Perhitungan Luasan Kelas Lereng .....                 | 72 |
| Gambar 4. 39 Peta Kelas Lereng Gundaling I.....                    | 73 |
| Gambar 4. 40 Peta Lereng Aman dan Tidak Aman.....                  | 74 |
