

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consists of two parts which are the conclusion and suggestion. First, the conclusion presents a summary of the findings of the study. Second, the suggestion is presented to readers, English language learners, and future researchers.

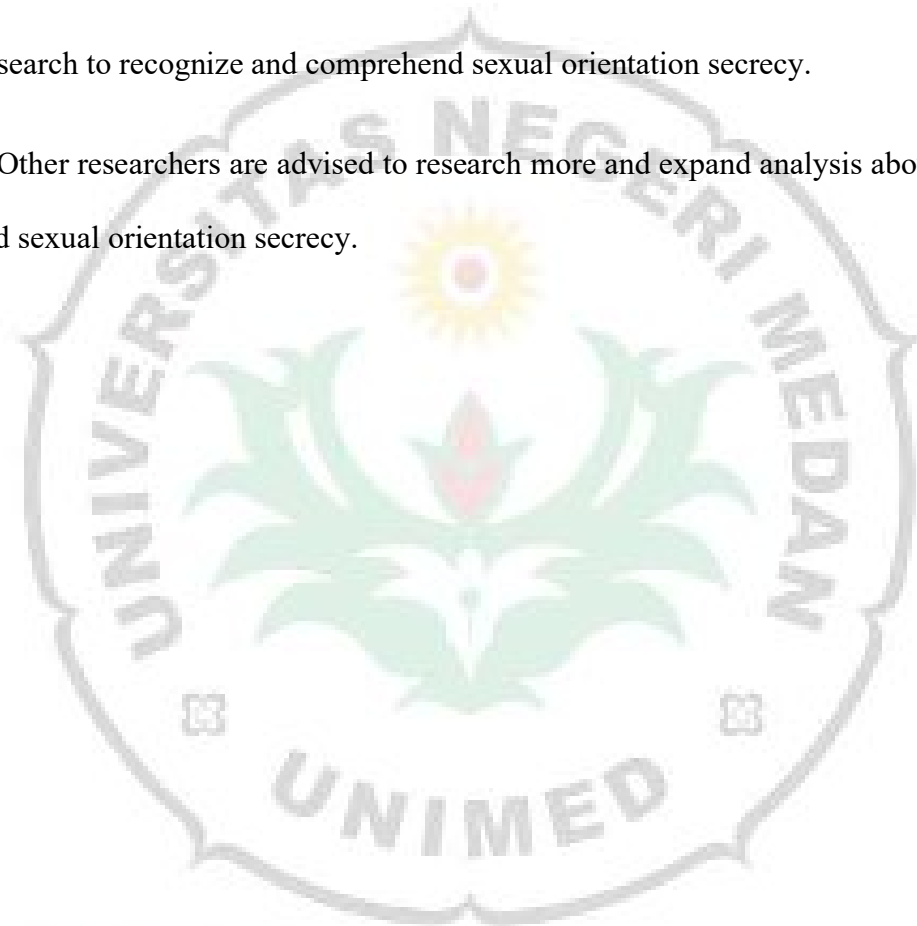

5.1 Conclusion

The researcher found that romantic secrecy in *Love Simon* is pricy because it is mentally stressful. The researcher found six types of the influence of sexual orientation secrecy based on romantic secrecy theory. The research showed that the most prevalent type of sexual orientation secrecy was break-up distress. If it is concluded based on the romantic secrecy theory, then the relationship of secrecy in sexual orientation secrecy is a burden for those who live it. Furthermore, researchers realized each type of influence on sexual orientation secrecy. For instance, when the main character confesses that he is tired of keeping his sexual orientation a secret, he realizes the thought of suppression.

5.2 Suggestion

The researcher admitted that this research had weaknesses since there were limitations. Therefore, several suggestions were recommended by the researcher to readers towards sexual orientation secrecy, as presented below:

1. For readers, it would be enriching their knowledge through queer critical analysis and secrecy.
2. Those who love watching Queer movies are advised to use this research to recognize and comprehend sexual orientation secrecy.
3. Other researchers are advised to research more and expand analysis about queer and sexual orientation secrecy.
