

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

A. Conclusions

The following conclusions can be drawn from this study after analyzing the data based on the theoretical basis used. It can be concluded that in *Far From The Madding Crowd* (2015) movie.

1. The realization of female masculinity in *Far From The Madding Crowd* (2015) movie can be seen from the utterances it uses in the movie. How female masculinity is manifested in *Far From The Madding Crowd* (2015) movie can be analyzed from the utterances that Bathseba used. There are three behavior that stand out in Bathseba as female masculinity : independent, firm and logical thinking. Where these traits are formed due to family and social background, where these two factors requires him to live in a harsh environment without parental love, and take full responsibility for the farm that was inherited by her uncle. While being logical in thinking, she gets it from self-confidence and does not want to be tied to men.
2. The main reason why main character have the characteristic of female masculinity in *Far From The Madding Crowd* (2015) movie, in this study there are two reasons, that its: Family background and social background. Bathseba lived in an environment that made her independent, where she lived a hard life without parental affection since childhood. And often did activities that were usually done by men such as riding alone in the middle

of the forest, or working hard in the fields even though she was already the owner of the entire plantation, she has a great sense of responsibility towards the estate her uncle left behind. While the characteristic of logical or reasonable thinking that Bathseba has is illustrated by her firm attitude of rejecting men who want to marry her, she thinks about what her future will be if she marries, she does not want to only be property owned by men.

But in conclusion, Bathsheba, the tough woman, realized that love is not destructive. She was still able to move forward as a strong figure even though she finally "gave in" to her feelings. Because she is aware of her need for a support figure. Being strong doesn't mean you don't need other people, it's the same as being a strong woman doesn't mean you don't need men in your life.

B. Suggestions

Based on the results of the analysis that has been done, some suggestions are as follows:

1. The weakness of this research is the lack of intertextual application to provide context specifically about the representation of the masculine. This research is limited to discussing only ways, and reasons how female masculinity can arise in someone. Therefore, this is a good opportunity for other researchers to carry out further studies, especially in exploring female masculinity in different objects, like poetry, vlogs, or masculinity in leaders woman.

2. It is recommended for readers, especially for linguistics students. It is important for linguistics students to recognize linguistic phenomena, especially female masculinity. The data findings in this study are also still very likely to be investigated further.
