

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The development procedure to develop a teaching media in this study is from R&D research method proposed by Borg and Gall. The steps used in this study to develop the teaching media are collecting data and information, analyzing data, designing media, validation by experts, revising the media, and final product.

After analyzing the data, it can be concluded that the existing media used by the teacher is less attractive so that the students become passive and less motivated. The result of need analysis showed that the students need an audio-visual media in teaching and learning activities. Since writing is one of the language skills that should be mastered well by the students, the teaching media should be creative, interesting and innovative to achieve the goal of teaching and learning. The use of interesting media by the teacher can enhance the quality of the teaching and learning process.

The teaching media produced in this study, namely teaching media for teaching recount text writing at grade eight, has developed and validated by the experts. Based on the assessment from Expert I and Expert II, the teaching obtained the average score of 92,5% which indicated that the teaching media is considered to be appropriate as teaching media used in recount text material.

B. Suggestion

Based on the study of Developing Canva as teaching media for teaching recount text writing at grade eight of SMP Negeri 1 Binjai Kabupaten Langkat, the writer would like to provide some suggestions to enhance the quality of teaching media.

1. For the Teachers

The teaching media can be implemented for teaching recount text. The teacher can also add some examples of recount text and the number of questions in the video according to the needs of teaching and learning process.

2. For the Students

The students can obtain the ideas by watching the video to improve their knowledge about recount text and produce their own learning product by writing recount text based on their experiences.

3. For the Future Study

This teaching media is only limited to recount text material which focuses on improving the students' writing abilities, it needs to be developed in other materials. There are limitations to the materials that the writer presents in this teaching media such as lack of in-depth material about simple past tense and lack of in-depth material to improve students' vocabulary to write in English. The writer really hopes that the future study will be able to add references to the developed learning media, such as enhancing the design and the content of the video to make it more attractive.
