

CHAPTER V

CONCLUSION AND SUGGESTION

In this chapter, the conclusion is based on the findings and discussion. The researcher provided the findings of the study as well as suggestions for teachers or lecturers, readers, and future researchers who want to investigate slang words. The suggestion is made specifically to encourage future researchers to conduct better study in the future.

A. Conclusions

After analyzing the slang words in Megan Thee Stallion's lyrics in an album *Good News* as the data on the previous chapter, the researcher found a conclusion to the data. There were three parts of social functions used in Megan Thee Stallion's lyrics in an album *Good News* namely, pursuit of self-identity, emotive feeling, and achieving politeness. There are 35 slang words found, 19 of them have social function emotive feeling, 14 of them have social function pursuit of self-identity, and 2 of them have social function achieving politeness. From all by understanding the social functions of slang words, the researchers conclude that the emotive feeling of the slang users is one of the biggest social functions because the singer dominantly use slang words in her lyrics to express the singer feeling.

The use of slang words in the lyrics has a meaning according to what the singer wants to convey to the listeners, that by using slang words the listener can

better emphasize the feelings that have already happened. Slang words help the user to describe themselves, some words could not support them to express their emotions. Slang, as one of the linguistic variants, has also contributed to widening and growing a language by continuously introducing new terms since it allows the language to adapt to the demands of the speaker's language itself to adapt to the needs of the speakers.

B. Suggestions

At the end of this chapter, there were some suggestions for readers who want to do the same study or enhance their knowledge, as follows:

1. **Learners:** The researcher hopes that this researcher can help students who are interested in slang words to understanding the types of English slang language, and the students will be able to learn more in various platforms such as podcast, vlog video, movie, stand up, and so on. The researcher hopes that all learners will benefit from learning and practicing how to utilize slang words when communicating in informal situations.
2. **Readers:** The researcher expects that all readers get benefit from learning the meanings of slang phrases, increasing their slang vocabulary, can using in daily communication, and understand the meaning of slang words used by users such as in movies, lyric songs, podcasts, etc.
3. **Other Researchers:** The next researcher can develop when they want to do the same field with different data such as podcast, talk show, movie, stand up, etc. there are many slang words as data in research of English language. For

upgrading the study, the researcher can use a different theory, research question and the method. Finally, it is proposed that this study will be useful as a reference for people or future researchers interested. Hopefully, this research will contribute to the progress of slang research in the future.
