

ABSTRAK

HUMAIROH PURBA. Pengembangan Media *Hand puppet* untuk Meningkatkan Keterampilan Menyimak Siswa Kelas III SD Negeri 014629 Pematang Sei Baru. Skripsi. Medan: Fakultas Ilmu Pendidikan Universitas Negeri Medan, 2023.

Penelitian dilakukan dengan tujuan untuk menghasilkan media *Hand Puppet* yang valid, praktis, dan efektif untuk meningkatkan keterampilan menyimak siswa kelas III SD Negeri 014629 Pematang Sei Baru T.A. Penelitian ini merupakan penelitian pengembangan (*Research and Development*) yang mengacu pada model pengembangan ADDIE yang terdiri dari 5 tahapan yaitu *Analysis, Design, Development, Implementation, dan Evaluation*. Subjek penelitian ini ialah siswa kelas III SD Negeri 014629 Pematang Sei Baru yang terdiri dari 29 siswa, 12 laki-laki dan 17 Perempuan. Sedangkan Subjek penelitian pengembangan media *Hand Puppet* yaitu validasi angket, ahli konten (isi), ahli desain dan validasi soal/tes, uji coba praktikalitas, dan uji coba efektivitas. Objek penelitian yang digunakan ialah “media pembelajaran *hand puppet*”. Instrumen penelitian yang digunakan dalam pengumpulan data yaitu observasi, wawancara dan angket instrumen penilaian kelayakan, kepraktisan, dan keefektifan. Hasil penelitian menunjukkan bahwa produk media yang telah dikembangkan dinilai layak untuk digunakan dalam kegiatan pembelajaran. Hal ini dapat dilihat dari persentase hasil penilaian validasi ahli desain media mendapatkan skor 91% masuk kriteria penilaian “Sangat Layak”. Kemudian persentase hasil penilaian validasi ahli konten (isi) media mendapatkan skor 93% masuk kriteria penilaian “Sangat Layak”. Hasil uji coba lapangan angket respon guru mendapatkan skor 93% yang masuk ke dalam kriteria “Sangat Praktis”. Sedangkan hasil uji coba lapangan angket respon siswa mendapatkan skor 91% yang masuk ke dalam kriteria “Sangat Praktis”. Berdasarkan hasil dari nilai *pre-test* siswa memperoleh nilai rata-rata 48 dan nilai *post-test* siswa diperoleh nilai rata-rata 81. Dapat diperoleh nilai *pre-test* dan nilai *post-test* dengan menggunakan rumus N-gain menunjukkan peningkatan pemahaman siswa setelah pembelajaran dilakukan sebesar “0,67” dengan kategori “sedang”.

Kata kunci: Pengembangan, Media *Hand Puppet*, Keterampilan Menyimak

ABSTRACT

HUMAIROH PURBA. Development of Hand Puppet Media to Improve Listening Skills of Class III Students of SD Negeri 014629 Pematang Sei Baru. Skripsi. Medan: Faculty of Education Universitas Negeri Medan, 2023.

The research was conducted with the aim of producing valid, practical and effective Hand Puppet media to improve the listening skills of class III students at SD Negeri 014629 Pematang Sei Baru T.A. This research is research development (Research and Development) which refers to the ADDIE development model which consists of 5 stages, namely Analysis, Design, Development, Implementation, and Evaluation. The subjects of this study were third grade students at SD Negeri 014629 Pematang Sei Baru consisting of 29 students, 12 boys and 17 girls. While the research subjects for Hand Puppet media development were questionnaire validation, content (content) experts, design experts and validation of questions/tests, practicality trials and effectiveness trials. The research object used is "hand puppet learning media". The research instruments used in data collection were observation, interviews and questionnaires for assessing feasibility, practicality and effectiveness. The results of the study show that the media products that have been developed are considered suitable for use in learning activities. This can be seen from the percentage of the results of the validation assessment by the media design expert who scored 91% in the "Very Eligible" assessment criteria. Then the percentage of results from the validation of media content (content) experts got a score of 93% included in the "Very Eligible" assessment criteria. The results of the teacher response questionnaire field trial obtained a score of 93% which was included in the "Very Practical" criteria. While the results of the field trial of the student response questionnaire obtained a score of 91% which was included in the "Very Practical" criteria. Based on the results of the pre-test scores, the students obtained an average score of 48 and the students' post-test scores obtained an average score of 81. It can be obtained that the pre-test scores and post-test scores using the N-gain formula show an increase in students' understanding after learning carried out at "0.67" with the category of "moderate".
