

FOREWORD

Praise and gratitude are expressed to Allah SWT, who has given mercy and grace, so that the author can complete the final assignment of this thesis well. The final thesis assignment is entitled "Development of Electronic Book Using Canva Media Based on FLIP PDF Professional on Biodiversity Topic for Class X SMA Negeri 2 Medan". Faculty of Mathematics and Natural Sciences (FMIPA), Medan State University.

The compiler of this thesis has gone through a long journey by going through various stages in accordance with the procedures applicable at FMIPA, Medan State University. The author realizes that the preparation of this thesis would not have been completed without the support and cooperation of several parties, both directly and indirectly. Through this opportunity, the author would like to express many thanks to all parties who have helped, supported, and collaborated in the preparation of this thesis. A big thank you to Mr. Wasis Wuyung Wisnu Brata, M.Pd, who has guided the author up to the thesis proposal seminar stage, and to Mr. Syarifuddin, M.Sc, Ph.D., as thesis supervisor. Thank you for your guidance and direction, motivation, and all input, as well as accepting the author as a new student for guidance so that the author can complete all stages in the process of preparing this thesis. To Mrs. Prof. Dr. Masdiana Sinambela, M.Si, Dr. Aswarina Nasution, M.Pd, and Mr. Dr. Idramsa, M.Sc, as an examining lecturer who has provided a lot of input, comments, and directions for this thesis so that it can be better and can be completed well.

The author also thanks Mr. Prof. Dr. Tri Harsono, M.Si, for his assistance in validating research instruments as a biodiversity topic expert; Mr. Halim Simatupang, M.Pd, for his assistance in validating research instruments as a biodiversity teaching learning expert; and Mr. Onggal Sihite, M.Si, for his assistance in validating research instruments as a design expert. The author also does not forget to thank the principal

and biology teacher at SMA Negeri 2 Medan for their assistance and for accepting and giving the author the opportunity to conduct research at the school.

The author does not forget to express his thanks to his beloved father, Bangun Panjaitan, S.H, and my mother, Tiurma Simatupang, who became one of the author's spirits in being able to complete his education to obtain a degree, which was the result of his efforts, hard work, and toil to provide the highest education possible. Maybe we have reached this point, and thank you for the prayers that are always included in every prayer for the author to be able to survive this far and prove it all. Maybe just saying thank you is not enough to repay everything for your beloved parents, but with the author reaching this point, perhaps you can show the author's love and affection for your beloved parents, and the author would like to thank Rizqi Abdullah Malik Partogi asudungan Panjaitan, Haikal Panjaitan, and Ari Afsani Panjaitan, who are always willing to be involved in the process of making this thesis. Pray that we can make our beloved parents happy for all the struggles they have sacrificed so far and that our beloved parents will be given good health and longevity so that they can see their children become successful people in the future.

And the author would like to thank friends who are always there in difficult and happy times, up to the worst times in life, and thank you for being present and willing to build friendships forever with Aisyah Warahma, Yana Sofia Putri, Salwa Khairani Ahmad, Fadhilah Rahma Purba, and Bismi Amrina. Thank you for approximately 4 years of giving the writer the enthusiasm to survive up to this point and all the encouragement, input, motivation, and support that served as a reminder for the writer to finish this until the last point. And thank you to BESP 2019 friends, KKN friends, KM2 friends, and PMM2 friends who have been encouragements, both directly and indirectly.

Lastly and most importantly, the author would like to thank himself for having struggled up to this stage and being able to survive and follow all the processes, stages, and paths that have been traversed. As well as being able to remain healthy and undergo this final thesis stage until reaching the highest peak in obtaining a bachelor's degree

in education (S.Pd), which will be an identity and appreciation for what the author has done up to this stage. I, myself, have been able to cooperate in working on this final assignment. Thank you for always thinking positively when things were not on your side and always trying to believe in myself, until finally I was able to prove that I could rely on myself.

The author is very aware that this thesis still has shortcomings and limitations; however, the author expects constructive criticism and suggestions, and the author really hopes that this thesis can provide benefits to readers and related parties, especially in perfecting the implementation of the Independent Learning Curriculum, which is still being developed in such a way that this thesis can be used as input and evidence to support the Independent Learning Curriculum in 2023/2024.

Medan, 23 January 2024

Author,

Sarah Nur Fadhilah Panjaitan
